SECURITY
SOLUTIONS

Transition from reactive risk mitigation strategies towards more intelligent and adaptive security models to stay a step ahead of threats to data confidentiality and integrity. At i-Telemetry, we take a dynamic and comprehensive approach to ensure timely risk identification and management through real-time security intelligence.

Using automation and data analytics, we provide a full suite of security services ranging from establishing a risk landscape and predicting potential threats to devising and implementing effective strategies to gain full control over data, access and processes.

Data is an enterprise's most critical asset. i-Telemetry is a trusted IT security solutions partner helping businesses identify vulnerabilities and build effective risk mitigation strategies. Based on industry best practices, cutting-edge technologies and years of hands-on experience, we design custom solutions that minimize security gaps and strengthen confidentiality, compliance, business continuity and disaster recovery models.

SECURITY

Make Security A Priority With Our Specialized Solutions

- Threat & Vulnerability Management
- Identity & Access Management
- Security Strategy & Operations
- Data Centre & Cloud SafetyManagement
- Application Security
- User Management – Authentication & SSO

Steps To Achieve An Effective Risk
Management Strategy

- Gaining a thorough understanding of business objectives and organizational strategies to identify and prioritize potential risks

- Designing a comprehensive risk profile of the organization using data analytics to assess risk impact and rank them according to the severity of consequences

- Communicating findings to stakeholders and internal teams to fill gaps in information needed to design implementation, review and monitor strategies

- Designing a model outlining the acceptability of each risk and implementing action plans to avoid, reduce, share, retain or transfer.

- Reviewing controls in place, analysing data for proactive risk assessment and continuous monitoring of implemented plans to ensure alignment with business goals
