

ENVIRONMENTAL MANAGEMENT

We offer expert solutions to help you monitor the environmental impact of your industrial operations, optimize resource utilization and ensure sustainability and compliance at all times.

Our comprehensive solutions include real-time data acquisition, continuous monitoring of crucial metrics, contextual visualization of data and custom report generation for effective environmental management.

As a pioneer in bringing real-time air, emission and effluent data to an all-inclusive dashboard for monitoring, analysis and reporting, we have added unmatched expertise and innovation to industrial environment management ecosystems across India.

Address Your Sustainability Challenges With I-Telemetry Technologies

- Eliminate human errors with a fully automated data collection system
- Work with domain experts and cutting-edge technologies
- Ensure data security, authenticity and accuracy with robust algorithms
- Access Secure Cloud-Based Dashboard For Graphical Representation Of Remote Site Data
- Monitor Site 24/7, Identify Fault/Failures In Real-Time To Optimize Operational Efficiency

**Waste

Eliminate Cost & Complexities with a Central Dashboard

Redefine telemetry with our rapidly deployable, wireless-enabled, IoT-based intelligent data collection system that acquires real-time environment data from remote locations and forwards it to a central dashboard for analysis.

Industrial sustainability and effective environmental monitoring strategies not only help avoid non-compliance penalties but also enhance corporate reputation thus promoting brand integrity.

- ▶ Home to all your telemetry data – metrics, logs, events etc. and backed by a powerful UI to ease business functionalities.
- ▶ Effective data visualization techniques to view metrics in context and resolve problems quickly. One stop for viewing, monitoring and analysis.
- ▶ Get yearly / monthly /weekly/daily reports, alerts and custom notifications on Email/ SMS/WhatsApp or your office communicator.
- ▶ Scalable to handle growing business needs, insights and value. Easy to seamlessly integrate with modern technologies via its API.
